

L14 PROJECT NAME: Water for Owode General Hospital

LOCATION: Obafemi Owode Local Area, Ogun State

Rotary Club of: **Mushin**

Summary: Owode General Hospital is the only hospital providing health care for the entire area of Owode Egba, comprising 1204 villages and towns with an estimated population of 347,000. There currently exists no public supply of water in the hospital. The staff and doctors use rain water collected from roof tops during the rainy season, or water is purchased from vendors with tankers during dry seasons. There is no public water supply in the town area due to the nature of its hilly terrain, and the use of a borehole is not realistic because of the terrain limitations. Therefore, the club is seeking partners to help establish a deep well and water treatment plant and generator for power.

Project budget;

Construction of deep well and associated equipment	\$4000
Water treatment plant	\$1800
Generator, housing, and electrical links	\$2500
Scaffolding and tanks	\$1400
Signage, other material not included above	<u>\$700</u>
TOTAL COST OF PROJECT	\$10,400

Rotary Club of Mushin will provide	\$500
International Rotary Club partner	<u>\$9900</u>
Total cost to provide deep well, water treatment, generator	\$10,400
